

ANNUAL REPORT

2024

July 1, 2023 to June 30, 2024

Amelia began her education at Davis Technical College in high school and quickly acquired her Diesel/Heavy Duty Technology certificate which allowed her to apply for and secure a position at Hill Air Force Base at the age of 18.

While working in this career, Amelia realized that she wanted more training to be able to advance, so she recently completed the Welding Technology program at Davis Tech, too.

Amelia says, ***"I truly believe that, with the education from Davis Tech, you will succeed. You have the skills, you have the knowledge, and you will succeed."***

UDC presented Davis Tech the Corrections Champion Award for exceptional support of its mission to improve people's lives and enhance community safety.

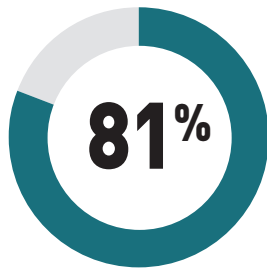

We hosted the first successful Career Fair for incarcerated and previously incarcerated students.

“This certificate is a means to an end. In addition to the skills you are taking out of here, you are also taking with you a path to get your foot in the door. My friends, your future is wide open. This is the beginning.”

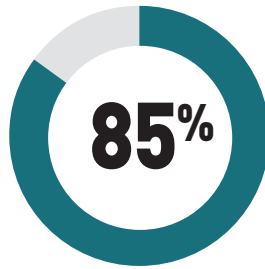

Daniel Rivera at the Davis Tech UDC graduation

SCHOLARSHIPS AND FINANCIAL AID

GIFT CHANGES LIVES

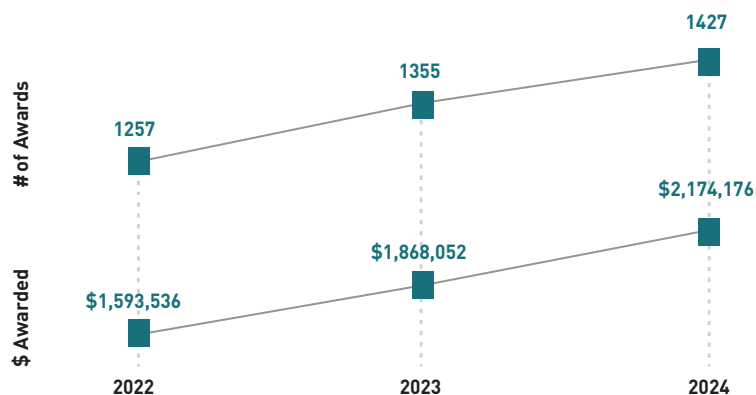

In April 2002, Roy and Elizabeth Simmons donated their ownership interest in the Skyline View Apartments to the Davis Technical College Foundation. Since then, the yearly payments the Foundation has received from this gift have totaled \$1,000,000. When the Barlow Corporation sold the apartments in the fall of 2023, they presented the Foundation with its portion of the final sale price – a donation of nearly \$6,800,000. This unprecedented gift will now serve as an endowment and change the lives of Davis Tech students for generations.

YOUNG AUTOMOTIVE

The Young Automotive Group generously donated a Volkswagen Tiguan for the Automotive Technology program. This advanced vehicle, equipped with cutting-edge technology, provides additional tools for hands-on learning. Young Automotive's ongoing commitment to the program, demonstrated through this impactful donation, is a testament to their dedication in fostering the next generation of skilled automotive technicians. In-kind donations support technical colleges, offering valuable resources that enhance hands-on learning experiences and bridge the gap between education and industry needs.

FINANCIAL AID AWARDS

REMOVING BARRIERS WITH SCHOLARSHIPS AND FINANCIAL AID

We know that **students who receive financial aid are twice as likely to graduate** compared to students who do not receive funding. Therefore, the Office of Scholarships and Financial Aid has been working closely with the Davis Technical College Foundation to substantially increase the amount of funding and the number of students awarded.

To remove barriers, we've simplified the scholarship form and increased marketing to get the message out about FAFSA. Due to these efforts, an increase in enrollment, and working personally with each student, the team has increased FAFSA submissions by 13.6% over the last two years.

100%

of Tuition and Fees are available for
75% of students who apply for FAFSA*

*For the additional 25% of students, assistance with 75-95% of tuition and fees are available. This is funded through a combination of federal financial aid, state tuition waivers, and foundation scholarships.
